In Delaware, Nemours has a partnership with school nurses that enables those nurses, with parent/guardian permission, to access Nemours' Electronic Health Records through a web-based portal. Read-only access allows the school nurse to view current medications, diagnoses, treatment plans, and care instructions, as well as appointments or procedures at the Nemours/Alfred I. duPont Hospital for Children or a Nemours duPont Pediatrics office. School nurses may only view a child's records if a parent or guardian has signed a legally compliant [authorization form](#) in advance. For added safety, Nemours tracks of everyone who uses the portal and what they view. Nemours enrolls between 1,400 and 1,700 students/patients into the program annually.⁴⁴ As models like this evolve, two-way information exchange could be explored.

45

A Connecticut study group recommended a newly envisioned health care system in which children's primary care providers would expand two-generation approaches and focus on population health and health equity.⁴⁹ Connecticut's Framework for Child Health promotes the use of payment methods to incentivize the restructuring

The Rhode Island Department of Health (RIDOH) is braiding multiple resources to test and support Health Equity Zones (HEZ) across the state. Through a collaborative, community-led process, each HEZ conducts a needs assessment and implements a data-driven plan of action to address conditions that are preventing people from being as healthy as possible. RIDOH provides support to communities to ensure the model is successfully implemented in line with
